To schedule any radiology exam, call 314-996-8080

CPT Code 76390

Prep:
(Patient should be informed, exam requires endovaginal coil to be inserted and remain for entire exam.
(Not typically performed without contrast; consult radiologist to discuss alternative imaging)

- Infection/discitis/AIDS
- Epidural abscess
- Tumor/cancer/metastases
- Syrinx
- Post-op evaluation
- Myelopathy/transverse myelitis
- Stenosis
- Known or suspected arteriovenous malformation
- Known or suspected aneurysm or stroke
- Undetermined vascular malformation
- Carotid stenosis
- TIA/stroke
- Vascular tumor
- Prostate cancer (3T MRI)
- Fibroids
- Scrotal/testicular/penile cancer
- Pelvic floor relaxation
- Bladder cancer/rectal cancer
- Hernia (incisional, laparoscopic, ostomy, femoral or inguinal)
- Urethral diverticulum/urethral cancer/periurethral mass (with endovaginal coil)

See list of indications for MRA Abdomen W and W/O Contrast

- Patient with renal insufficiency or hemodialysis
- Renal artery stenosis
- Mesenteric ischemia
- Post stent graft evaluation
- Patient with renal insufficiency
- Patient pregnant
- Pelvic deep vein thrombosis
- Leg swelling with suspected pelvic mass
- Pelvic deep vein thrombosis and varicose veins
- Known or suspected vascular malformation
- Assessment of upper extremity vessels
- Peripheral vascular disease
- Known or suspected vascular malformation (Requires radiologist consultation)
- Jaw or face reconstruction/free fibular flap graft
- Popliteal entrapment

(Each exam is 20-30 minutes. Total spine MRI is rarely well tolerated by patients in pain.)

MRI (Body) Pelvis W and W/O Contrast
MRA Abdomen W and W/O Contrast
MRA/MRV Upper Extremity W and W/O Contrast
MRA Runoff W and W/O Contrast

MRI Brain W and W/O Contrast
MRI Brain W/O Contrast
MRI Orbits, Face or Neck W and W/O Contrast
MRI C-Spine W and W/O Contrast
MRI Abdomen W/O Contrast
MRI Abdomen & Pelvis W/O Contrast
MRI (Bony) Pelvis W and W/O Contrast
MRI Pelvis W/O Contrast (Body & MSK Pelvis)
