

# It matters who reads your mammogram.

WASHINGTON UNIVERSITY MALLINCKRODT INSTITUTE OF RADIOLOGY

3D mammograms can reduce false positives and increase cancer detection.

The accuracy of your diagnosis starts with the expertise of your radiologist.

With Washington University radiologists, your images are read by physicians who specialize in breast imaging, every time.

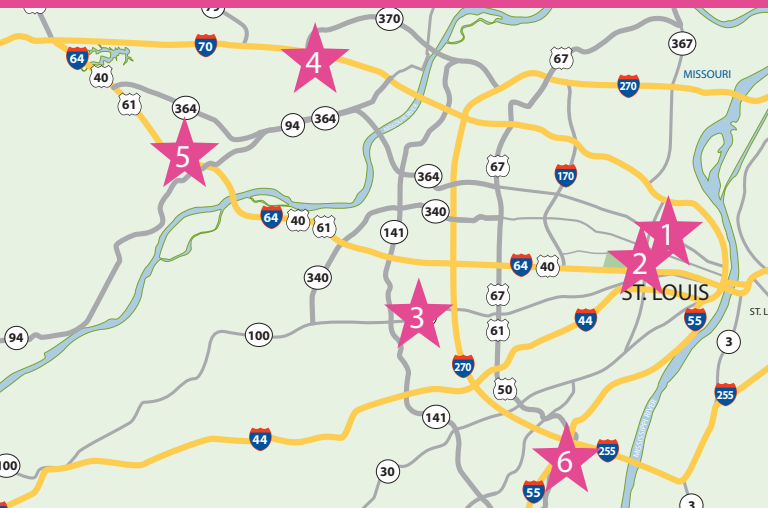

Our breast health experts have more 3D experience than any other imaging center in the bistate region, and we offer each screening mammography patient a personalized breast cancer risk assessment.

See reverse for a mammography location near you.
